

# Meirzhan Baitangatov

Web and Mobile Developer

## Profile

I am a hardworking and goal-oriented individual specializing in information technology, with strong knowledge in various programming languages and database management systems.

## Employment History

### Private Tutor, Kuala Lumpur

2021 — 2023

- Programming tutor, teaching various programming languages including Java, Python, and C.
- Developed personalized lesson plans and helped students improve their programming skills.

### Full-stack Developer at Far-Tech, Kuala Lumpur

January 2023 — August 2024

- Created and managed a chatbot using technologies such as React, Twilio API, and Google Cloud.
- Engaged directly with clients to understand and meet their requirements.
- Worked in cross-functional teams to ensure smooth integration and deployment of the chatbot.
- Leveraged Google Cloud for scalable and efficient backend infrastructure.
- Implemented Twilio API for robust communication features in the chatbot.
- Continued learning and adapting to new technologies to enhance the chatbot's functionality.

### Full-stack Developer at Freelance, Aktau

September 2024 — Present

- Developed and maintained an **admin dashboard** for a clothing-selling application using **Vue.js** and **Spring Boot**.
- Collaborated with stakeholders to gather requirements and ensure the dashboard met business needs.
- Utilized **Spring Boot** for scalable and efficient backend infrastructure, handling product management, order tracking, and user roles.
- Designed a **responsive and user-friendly interface** using Vue.js, ensuring seamless navigation and data visualization.
- Built a **static website** using **React**, **Vite**, and **CSS**, optimizing performance and maintaining a clean UI/UX.

## Skills

## 🎓 Education

**Bachelor of Science (Honours) in Information Technology, specializing in Mobile Technology, Asia Pacific University, Kuala Lumpur, Kuala Lumpur**

September 2021 — August 2024

CGPA: 3.5

## ★ University and Corporate Hackathons

Participated in various hackathons, including Google, Tune Protect, ADA, AWS DeepRacer, and PayNet. During these events, we developed solutions for enhancing university services, insurance, chatbots, autonomous systems, and payment technologies. Through these experiences, I gained expertise in machine learning, chatbots, and payment systems, improving my programming and problem-solving skills.

## ⚙️ Courses

**Database Management with Java and SQL, Amazon**

December 2024

**Full Stack Web Development, Amazon**

November 2024

**Introduction to Git and GitHub, Google**

November 2024

**Java Programming: Arrays, Lists, and Structured Data, Duke University**

November 2024

**Java Programming: Solving Problems with Software, Duke University**

November 2024

**Programming Foundations with JavaScript, HTML, and CSS, Duke University**

November 2024

**CCNA: Introduction to Networks, Cisco**

2022

Database Management

AWS Cloud Solutions

Google Cloud Platform

C/C#

Spring Boot

Node.js

ASP.NET Core
